EDUCATION

GL Bajaj Institute of Technology and Management

2023 – 2027

B.Tech in Computer Science and Engineering (Data Science)

TECHNICAL SKILLS

Languages: C++, TypeScript, JavaScript, Python

Frontend: Next.js, React.js, TailwindCSS, Framer Motion

Backend: Node.js, Express.js, REST APIs

Databases: MySQL, PostgreSQL, MongoDB, Supabase, Redis, Prisma

AI/LLM: LLM Integration, Generative AI, Cerebras, Groq, Gemini API

Core CS: Data Structures and Algorithms, Object-Oriented Programming, Operating Systems, DBMS, Computer Networks

Tools: Git, GitHub, Vercel, OAuth, CI/CD, npm

PROJECTS

CodeAutopsy – Codebase Intelligence Platform

Live | GitHub

Next.js, TypeScript, D3.js, React Flow, Supabase, Redis, Cerebras

- Built a platform that analyzes any GitHub repository, public or private via GitHub OAuth, across six modules including dependency visualization, blast radius detection, risk scoring, and documentation generation
- Implemented Tarjan's algorithm for fragile point detection and PageRank for hub ranking; reduced LLM context overhead by 80% using Redis caching and file importance scoring
- 77+ GitHub stars, 6 forks, and 1,300+ repository clones for an open-source project

MockMorph – Hybrid AI Synthetic Data Engine

Live | GitHub

Next.js, TypeScript, Groq, Prisma, PostgreSQL

- Built a data generation engine that combines LLM-generated seed rows with a rule-based scaling engine, produces 10,000+ relational rows without repeated API calls
- Applied Kahn's Algorithm to resolve foreign key dependencies in correct order and used Next.js Edge Runtime streaming to handle large outputs without memory errors

OfferVault – Anonymous Placement Registry

Live | GitHub

Next.js, TypeScript, Supabase, PostgreSQL

- Built a placement data platform restricted to verified institutional email addresses (.edu/.ac.in), with user identity isolated at the database level using PostgreSQL RLS
- Developed an analytics dashboard to search and compare placement data by college, company, branch, and batch year
- Built a CTC breakdown engine that parses offer letters into Base Pay, Joining Bonus, and ESOPs, with a company leaderboard and side-by-side institutional comparison tool

ACHIEVEMENTS

- CodeAutopsy was featured by a 115K-follower tech account on X, driving 242 visitors and 1,300+ GitHub repository clones
- Solved 250+ Data Structures and Algorithms problems on LeetCode using C++

CERTIFICATIONS

- 100xDevs Cohort 3 — Web Development, DevOps & Blockchain (Harkirat Singh)
- Meta Front-End Development Professional Certificate (Coursera)
- Cisco Networking Academy: Enterprise Networking, Security, and Automation (Credly)
